Lab 2: servlets with session state

Create 3 servlets with the names: **allnamesservlet, addnamesservlet** and **removenamesservlet**

Create now a **Person** class in the package **names**.

Write now an servlet application where you can add and remove names to a list.
To make this work, you will need to add a list of Person names in the HttpSession object.

List of names
key= 34 first name= James last name= Brown

key= 66 first name= John last name= Doe

[Show all Names]

Key=[   ]   First Name=[   ]   Last Name=[   ]   [Add]

Key=[34   ]   [Remove]

List of names
key= 66 first name= John last name= Doe

[Show all Names]

Key=[   ]   First Name=[   ]   Last Name=[   ]   [Add]

Key=[   ]   [Remove]
